

CloudyDays Engineering Intern

CloudyDays is a Portland area cloud computing company offering a cloud scalability platform to help companies deploying their applications to the cloud scale successfully. Sophisticated web load generation, load testing, and application performance analytics enable our customers to uncover performance issues before they impact their business.

The engineering intern will be responsible for developing critical software building blocks and advanced web technology as part of CloudyDays proprietary technology. It is an exciting opportunity to be part of a leading edge cloud computing startup, working with a world-class engineering team.

Qualifications include:

Knowledge of at least one of the following: Ruby, ROR, Java, Wordpress, Flash, PHP. Great communications skills, the capability of working in a fast paced environment, enthusiasm and motivation.
